

## iPhone 4 iPhone 3Gs &iPod FM Transmitter

### Product Specification

Frequency Range: 88.1 ~ 107.8MHz

Working current: 15mA

Sleep current: 15uA

SNR: ≥60dB Stereo

THD: ≥0.1%

Operating temperature:-10℃~ +65℃

### Compatible with:

Work for iPhone ; iPhone 3G; iPhone 3GS; all iPod models

### Accessories:

USB Car charger

USB cable

### User Manual:

This equipment is plugged in the Ipod, and it sweeps automatically frequency, Ipod will display music at the selected frequency.

### Packing list:

Custom Packaging: blister packaging

Product dimension: 76(L) × 51(W) × 24(H) mm

100 pcs / carton

Carton size: 50×42×35CM

G.W.: 12kgs

N.W.: 11kgs

#### FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
